

Executive Function Student Checklist

- Covers 12 Areas of Executive Functioning
- Targeted Interventions for **High School**
- Plus Tailored, Skill Building Goals

High School

SCROLL
to take a look inside!

Use for IEPs / FBAs / BIPs

Ideal For:

- Special Education Professionals
- School Psychologists
- Behavior Specialists

The image displays the 'Executive Function Checklist (K-2)' form across three digital devices: a tablet, a laptop, and a desktop monitor. The form is designed to assess and track executive function skills in kindergarten and second-grade students.

Form Structure:

- Header:** Executive Function Checklist (K-2)
- Student Information:** Student Name, DOB, Grade, Teacher/Rater, School, Date Completed.
- Checklist:** A table with columns for 'No' and 'Yes' for various skills.
- Interventions:** A section for 'Potential Interventions' with checkboxes for specific strategies.

Skills Assessed (from the 'Planning' section visible on the devices):

- Decides what materials are needed before starting an activity.
- Follows teacher directions to gather materials.
- Puts steps of a task in the correct order with help.
- Begins a task after instructions are given.
- Uses visual prompts or schedules to understand the day's structure.
- Makes simple decisions about what to do first when given options.
- Prepares for transitions between activities with reminders.
- Follows a basic schedule (e.g., understanding when it's snack time or clean-up time).
- Completes one part of a task before moving to the next.
- Asks for help if unsure of the next step.

Interventions (from the 'Planning' section visible on the devices):

- ☐ Provide visual schedules and checklists to help students follow steps.
- ☐ Break tasks down into small, manageable parts and give instructions one step at a time.
- ☐ Use picture cues to guide students through multi-step activities.

Sample Goals (from the 'Attention' section visible on the desktop monitor):

- Student will attend to a task for at least 5 minutes without requiring more than 2 teacher prompts on 80% of opportunities.
- During group instruction, Student will remain seated and focus on the teacher with no more than 1 reminder in 4 out of 5 sessions.
- Student will stay focused on independent work for 10 minutes with a visual reminder, increasing task completion from 50% to 80% for 4 consecutive weeks.
- Student will sustain attention during group instruction for at least 10 minutes without being redirected more than 2 times in 4 out of 5 days.
- Student will independently use a visual aid (e.g., a focus chart or a timer) to stay on task for a 15-minute work period, achieving this in 80% of opportunities for 5 out of 6 weeks.
- Student will stay on task during independent work for 10 minutes with no more than 1 prompt in 4 out of 5 sessions.

Support Your Students with Executive Functioning Needs

- ✓ Planning
- ✓ Attention
- ✓ Attentional Control
- ✓ Persistence
- ✓ Self-Awareness
- ✓ Inhibition
- ✓ Non-Verbal Working Memory
- ✓ Verbal Working Memory
- ✓ Emotional Control
- ✓ Organization
- ✓ Time Management
- ✓ Self-Motivation

12 Executive
Functioning
Skill Areas

How to Use This Resource

1 Determine area/s of student need using checklist

2 Find a targeted intervention

3 Choose a tailored, measurable goal or goals for IEP/FBA/BIP

Executive Function Checklist (K-2)

Attention (K-2)	No	Yes
Listens and focuses on the teacher during circle time.		
Focuses on tasks for at least 5 minutes without needing redirection.		
Pays attention to a short story or video without being distracted.		
Stays in one area to complete an activity.		
Looks at the teacher or speaker when listening.		
Stays focused during quiet work time.		
Completes simple activities without wandering away.		
Can follow simple instructions while staying on task (e.g., coloring or building).		
Works on one task without shifting to another task prematurely.		
Listens and follows along with group activities (e.g., music, games).		

**These behaviors reflect how younger students are expected to engage and sustain attention for short periods, with gradual increases in duration.*

Attention - Sample Goals

- Student will attend to a task for at least 5 minutes without requiring more than 2 teacher prompts on 80% of opportunities.
- During group instruction, Student will remain seated and focus on the teacher with no more than 1 reminder in 4 out of 5 sessions.
- Student will stay focused on independent work for 10 minutes with a visual reminder, increasing task completion from 50% to 80% for 4 consecutive weeks.
- Student will sustain attention during group instruction for at least 10 minutes without being redirected more than 2 times in 4 out of 5 days.
- Student will independently use a visual aid (e.g., a focus chart or a timer) to stay on task for a 15-minute work period, achieving this in 80% of opportunities for 5 out of 6 weeks.
- Student will stay on task during independent work for 10 minutes with no more than 1 prompt in 4 out of 5 sessions.

Notes/Comments

Executive Function Checklist (K-2)

Student Name: _____ DOB: _____ Grade: _____
Teacher/Rater: _____ School: _____
Date Completed: _____

Planning (K-2)	No	Yes
Decides what materials are needed before starting an activity.		
Follows teacher directions to gather materials.		
Puts steps of a task in the correct order with help.		
Begins a task after instructions are given.		
Uses visual prompts or schedules to understand the day's structure.		
Makes simple decisions about what to do first when given options.		
Prepares for transitions between activities with reminders.		
Follows a basic schedule (e.g., understanding when it's snack time or clean-up time).		
Completes one part of a task before moving to the next.		
Asks for help if unsure of the next step.		

**Young children can grasp simple planning tasks, but they may need consistent prompts and visual supports.*

Planning - Potential Interventions

- ☑ Provide visual schedules and checklists to help students follow steps.
- ☑ Break tasks down into small, manageable parts and give instructions one step at a time.
- ☑ Use picture cues to guide students through multi-step activities.

Works on one task without shifting to another task prematurely.		
Listens and follows along with group activities (e.g., music, games).		

*These behaviors reflect how younger students are expected to engage and sustain attention for short periods, with gradual increases in duration.

Attention - Potential Interventions
☐ Use timers to help students focus for increasing intervals (start with 3-5 minutes and gradually build).
☐ Provide frequent breaks and use movement-based activities to reset attention.
☐ Break tasks into short, engaging activities to maintain student focus.
☐ Seat the student in a low-distraction area during quiet work times.
☐ Use visual reminders (e.g., a focus chart) to remind students to stay on task.

Executive Function Checklist (K-2)

Attention - Sample Goals
• <i>Student</i> will attend to a task for at least 5 minutes without requiring more than 2 teacher prompts on 80% of opportunities. • During group instruction, <i>Student</i> will remain seated and focus on the teacher with no more than 1 reminder in 4 out of 5 sessions. • <i>Student</i> will stay focused on independent work for 10 minutes with a visual reminder, increasing task completion from 50% to 80% for 4 consecutive weeks. • <i>Student</i> will sustain attention during group instruction for at least 10 minutes without being redirected more than 2 times in 4 out of 5 days. • <i>Student</i> will independently use a visual aid (e.g., a focus chart or a timer) to stay on task for a 15-minute work period, achieving this in 80% of opportunities for 5 out of 6 weeks. • <i>Student</i> will stay on task during independent work for 10 minutes with no more than 1 prompt in 4 out of 5 sessions.
